PROFILE

Full Stack Developer · AI, working remotely from Venezuela. I build websites and apps with React, TypeScript, Node.js, Python, Supabase and PostgreSQL, from design to deployment. I created Forja, a coaching app in production with 160 tests, and I maintain open source projects with measured numbers in the repo. Years in sales and customer service taught me to listen, find the real problem and explain it clearly.

EXPERIENCE

Developer · Freelance — Oct 2021 – Present
Remote

- Built the new website for Dr. Eddy Hernández, bariatric surgeon, with React + Vite (WordPress migration in progress): lead form with Turnstile, leads stored in Supabase and email alerts.
- Designed the patient intake flow: a WhatsApp button that asks for the form before opening the chat, without exposing the number, and a thank-you page to measure Meta Ads conversions.
- Created Forja, an app for personal trainers (workouts, diet, measurements, progress and payments) with React + Supabase and row level security; installable PWA in production with 160 tests.

DocsiApp · Customer Support · Apr 2026 – Present · weekends

4Geeks Academy — Oct 2025 – Oct 2026
Remote · Part-time

Community & Public Support Specialist · Senior Mentor — May 2026 – Oct 2026
Community Specialist — Oct 2025 – May 2026

- Mentored students in the Full Stack program, which I graduated from in 2025: debugging, best practices, Git and GitHub.
- Reviewed student projects and gave technical feedback.
- Managed the digital community and student support.

Sales Manager · Iltuocarro — 2015 – 2017
Venezuela

- Sales operations, team performance and negotiation with clients and suppliers. Before that, at the family business (2005 – 2014), I moved from operational roles to management: sales, inventory and conflict resolution.

OPEN SOURCE

- **`polaris-local-ai`**: local AI stack for an AMD RX 580 8 GB: OpenAI-compatible API router (6 models), SD 3.5 + SD 1.5, Whisper and an agent engine; Vulkan, measured benchmarks. MIT.
- **`Webs para negocios`**: 6 live demos by industry (barbershop, delivery, sports, hardware store, florist, taxi) with React + Vite + Tailwind on Vercel.
- **`Accepted contributions`**: pythiaLabs (6 PRs), DevSwitch, icon-sprite.

TOOLS

Frontend
React · TypeScript · JavaScript · Vite · Tailwind · Astro

Backend
Node.js · Python · Flask · PHP · Laravel · APIs

Data
PostgreSQL · Supabase (row level security) · SQLite

AI
Agents · MCP · Claude · Codex · OpenCode · Hermes · local AI

Quality
Tests first · Vitest · pytest · node:test · GitHub Actions

DevOps
Git · GitHub · Docker · Linux · Vercel · Cloudflare

Web
WordPress · SEO · Google Tag Manager

EDUCATION

4Geeks Academy
Full Stack Developer · Mar – Dec 2025

Lexpin
Programming Bootcamp · 2021 – 2022

UNEFM
Medicine · studied until 2021, not completed

Colegio San Francisco Javier
High School Diploma in Science · 2011

CERTIFICATIONS

- **4Geeks Academy, 2026:** 8 certificates, 159 h: AI for Professionals, Prompt Engineering, AI Content Creation, No-Code & Automations, JavaScript & DOM, Real-time HTTP, Git & CLI, Start Coding JavaScript.
- **BIG school:** AI: From 0 to Agents (6 h, 2026); Introduction to AI Development (6 h, 2025).
- **Claseflix, 2024 – 2025:** JavaScript, SEO, WordPress and more.
